Open-Source Contributions

CovidET <https://github.com/honglizhan/CovidET>.

CovidET (**E**motions and their **T**riggers during **Covid**-19) is a dataset of 1,883 English Reddit posts related to COVID-19, which contains manual annotations of perceived emotions and abstractive summaries of their triggers described in the post.

CovidET-EXT <https://github.com/tsosea2/CovidET-EXT>.

CovidET-EXT is a dataset that augments Zhan et al. (2022)'s abstractive dataset CovidET (in the context of the COVID-19 crisis) with extractive triggers. The result is a dataset of 1,883 Reddit posts about the COVID-19 pandemic, manually annotated with 7 fine-grained emotions (from CovidET) and their corresponding **extractive** triggers.
