Education

2021 –   **Ph.D. in Computational Linguistics (Minor in Computer Science)**.
Department of Linguistics, The University of Texas at Austin, Austin, TX
- *Advisor:* Professor Junyi Jessy Li
- *Selected Coursework:* Natural Language Processing, Research in Computational Linguistics

2017 – 2021   **B.A. in English Linguistics (Second Major in Law)**.
School of Foreign Languages, Shanghai Jiao Tong University, Shanghai, China

Research Interests

Ph.D. Work   The ambition of my Ph.D. research is to **build emotionally intelligent AI systems in a broader social context**. Specifically, I focus on Affective Computing, which tries to build NLP models with a deeper emotional understanding.

➔ **EMNLP 2022 & ACL 2023**: We tapped into the questions of *"How do people feel about and make sense of what took place in their lives during major social events?"*, and proposed Emotion Detection and Trigger Summarization, a new task to detect perceived emotions in text automatically and abstractively summarize triggers of each emotion.

➔ **EMNLP 2023 Findings**: Grounded in Psychology theories, my work explored the capability of LLMs on complex emotional understanding tasks: are they able to assess and explain *cognitive appraisals* (how individuals subjectively interpret and evaluate a situation) that lead to diverse emotional experiences?

Refereed Publications

* denotes equal contributions

EMNLP 2023 (Findings)   **Hongli Zhan**, Desmond Ong, and Junyi Jessy Li. Evaluating subjective cognitive appraisals of emotions from large language models. In *Findings of the Association for Computational Linguistics: EMNLP 2023*, Singapore, December 2023. Association for Computational Linguistics.

ACL 2023   Tiberiu Sosea*, **Hongli Zhan***, Junyi Jessy Li, and Cornelia Caragea. Unsupervised extractive summarization of emotion triggers. In *Proceedings of the 61st Annual Meeting of the Association for Computational Linguistics (Volume 1: Long Papers)*, pages 9550–9569, Toronto, Canada, July 2023. Association for Computational Linguistics.

EMNLP 2022   **Hongli Zhan***, Tiberiu Sosea*, Cornelia Caragea, and Junyi Jessy Li. Why do you feel this way? Summarizing triggers of emotions in social media posts. In *Proceedings of the 2022 Conference on Empirical Methods in Natural Language Processing*, pages 9436–9453, Abu Dhabi, United Arab Emirates, December 2022. Association for Computational Linguistics.

Teaching Experience

The University of Texas at Austin

LIN 306   **Intro to the Study of Language**, *Guest Lecturer*, Spring 2023.

LIN 373N   **Machine Learning Toolbox for Text Analysis**, *Guest Lecturer*, Fall 2022.

LIN 373N   **Machine Learning Toolbox for Text Analysis**, *Graduate Teaching Assistant*, Fall 2022.

LIN 350   **Computational Semantics**, *Graduate Teaching Assistant*, Fall 2021.

Professional Service & Research Appointments

Reviewer, *EMNLP'23, ICRA'24*.

Student Volunteer, *ACL'23*.

Spring 2023 –   **Organizer**, *Natural Language Learning Reading Group*, UT Austin.

Fall 2021 –   **Graduate Research Assistant**, *Supervised by Professor Junyi Jessy Li*, UT Austin.

Mentoring

Fall 2023 –   **Allen Zheng**, *B.S. in Computer Science (Turing Honors) & Mathematics*, UT Austin.

Fellowships & Awards

Fall, 2022   **Professional Development Award for Attending EMNLP 2022**, *UT Austin*, 1,200 USD.

Spring, 2022   **COLA Supplemental Graduate School Fellowship**, *UT Austin*, 5,000 USD.

2021   **Outstanding Graduate**, *Shanghai Jiao Tong University*.

2021   **Outstanding Undergraduate Thesis Award**, *Shanghai Jiao Tong University*.

Conference Presentations

ACL 2023   **Unsupervised Extractive Summarization of Emotion Triggers**, *Toronto, Canada*, presented in-person on July 11th, 2023.

EMNLP 2022   **Why Do You Feel This Way? Summarizing Triggers of Emotions in Social Media Posts**, *Abu Dhabi, United Arab Emirates*, presented in-person on Dec 9th, 2022.

Open-Source Contributions

CovidET   `https://github.com/honglizhan/CovidET`.
CovidET (**E**motions and their **T**riggers during **Covid**-19) is a dataset of 1,883 English Reddit posts related to COVID-19, which contains manual annotations of perceived emotions and abstractive summaries of their triggers described in the post.

CovidET-EXT   `https://github.com/tsosea2/CovidET-EXT`.
CovidET-EXT is a dataset that augments Zhan et al. (2022)'s abstractive dataset CovidET (in the context of the COVID-19 crisis) with extractive triggers. The result is a dataset of 1,883 Reddit posts about the COVID-19 pandemic, manually annotated with 7 fine-grained emotions (from CovidET) and their corresponding **extractive** triggers.

CovidET-Appraisals   `https://github.com/honglizhan/CovidET-Appraisals-Public`.
CovidET-Appraisals is the most comprehensive dataset to-date that assesses 24 cognitive appraisal dimensions of emotions, each with a natural language rationale, across 241 Reddit posts. CovidET-Appraisals presents an ideal testbed to evaluate the ability of large language models — excelling at a wide range of NLP tasks — to automatically assess and explain cognitive appraisals.

Language Skills

Mandarin   **Native**.

English   **Near-Native**.
- *TOEFL iBT: 112/120*
- *GRE: Verbal 162/170, Quantitative 167/170, Analytical Writing 5.0/6.0*
- *Test for English Majors Band 8 (TEM-8): Good*
- *Test for English Majors Band 4 (TEM-4): Excellent (90/100)*

Japanese   **Upper-Intermediate**.
- *Japanese was taught as my Second Foreign Language course at SJTU*

Italian   **Intermediate**.
